

Pick-Off Tee / Resistive Tap 30 dB SMA Female from DC to 8 GHz

Pick Off Tees / Resistive Taps Technical Data Sheet

PT30-8

Description

Pick Off Tees, also known as Resistive Taps, are unique in that they allow coupling of a signal over a very flat, wide bandwidth, and can be used in much smaller configurations than stripline couplers. These non-directional devices are a cost-effective solution when monitoring is required.

The PT30-8 is part of Werbel Microwave's catalog of Pick-Off Tees. The device offers flat, 30-dB tapping over the bandwidth DC to 8 GHz. Compact enclosure available with SMA female connectors.
